Release notes for the **2.9.0** **Hotfix 2 PWD** release of the EIOPA **Pension Funds** DPM and XBRL taxonomy

I Introduction

This pension funds DPM and XBRL taxonomy package release 2.9.0 Hotfix 2 PWD is provided to be used from the 31/12/2025 reference date until a new version is announced in line with the Governance of Taxonomy Releases.

It covers both the definition of reporting requirements and the underlying regulations for this release.

This optional hotfix is intended to support reporting by undertakings for which the NACE Rev. 2.0 classification is not available, and who therefore need to report NACE Rev. 2.1 classifications, as updated by [Eurostat](#). This release addresses the following cases:

- When NACE Rev. 2.0 is available for all reporting lines, it must continue to be reported in the same column as before. **No changes or use of this taxonomy hotfix are required for these undertakings.**
- When NACE 2.0 is not available for some or all lines, undertakings shall report NACE 2.0 for the lines where it is available, and NACE 2.1 for the lines where it is not. Optionally, undertakings may report both NACE 2.0 and 2.1 codes for all or some lines. **In all these cases, undertakings will need to apply this hotfix to access the new NACE 2.1 columns and report as detailed in the Annex 1 of this document.**

From a technical perspective, the xBRL instance remains backwards compatible, maintaining the same schemas and entry points as the current version (i.e. this is not a corrective release). The update introduces only new columns, metrics, and category hierarchies for NACE 2.1, added as new items in the xBRL dictionaries and update the NACE 2.0 related validations. All National Competent Authorities (NCAs) have to update their systems to support this release, enabling undertakings that have to apply the optional hotfix to report using the NACE Rev. 2.1 classification.

V DPM

For DPM explanation and application in the context of reporting please see [EIOPA DPM Documentation](#).

DPM is defined in two workbooks:

- [EIOPA DPM Dictionary 2.9.0 Hotfix 2](#) Including Pan-European Personal Pension Products KID, Pan-European Personal Pension Products PR, Solvency II and Pension Funds;
- [EIOPA Pension Funds DPM Annotated Templates 2.9.0 Hotfix 2](#)

The most important changes incorporated in 2.9.0 hotfix 2 PWD release are focused on introduction of NACE 2.1 and contain:

- Adding new column C0175 to:
 - PF.06.02.24.02
 - PF.06.02.25.02
 - PF.06.02.26.02

- PFE.06.02.30.02
- PFE.06.02.31.02.

VI Validations

Data checks are listed in [Pension Funds Validations](#) where all validations for all business requirements scopes appears in a single workbook. The syntax used to define validations has remained unchanged from the previous release and is available in [EIOPA Validations syntax](#) file.

The following release includes amendments to PBV49 and PBV50 validations, to include the newly defined C015 column. In addition, a new validation (BV217) has been defined, to ensure the NACE 2.1 will not be used for submissions with reference date before 2025-12-31.

VII notes

- This 2.9.0 hotfix 2 release includes a structured representation of EIOPA and ECB Pension Funds reporting requirements. It provides National Competent Authorities (NCAs) and National Central Banks (NCBs) with the technical format to collect individual data from reporting entities.
- The 2.9.0 hotfix 2 release comprises individual data reporting requirements of both EIOPA and ECB, in order to facilitate a single reporting flow.
- Technical specifications are also needed for NCAs submissions of aggregated data to EIOPA. In order to allow for this business requirement to be fulfilled, some of the required technical data points are included.
- "Derogations, EP and templates" and "EIOPA's explanations for L2" are added for information to the Annotated templates in order to provide an overview of differing reporting obligations. Differing reporting obligations may apply due to derogations granted to reporting entities by national regulators and central banks. Some improvements could still be implemented in the next releases. For more information, please refer to the underlying regulations and contact your NCA and NCB.
- Technical implementation of the PF.52.01.24.02 allows the template to be completed with "Not applicable/All geographical areas". However, the instructions specify that the template should be filled for each country where a sub-account is available or where the PEPP is provided. Therefore, a PEPP provider should report for each country individually in template in PF.52.01.24.02 but can aggregate the data from the alternative investment options in that country in case these are not significant compared to the Basic PEPP.
- EIOPA would like to emphasize that it does not guarantee the stability of the layout of excel files provided as part of the package materials. However, EIOPA would like to assure that the changes should not limit nor constrain any information on the modelling or validations provided so far.

- EIOPA PF 2.9.0 optional Hotfix 2 shares the DPM Documentation, XBRL Taxonomy Documentation, XBRL Filing rules, DPM Database documentation, and Technical instructions for EIOPA and ECB Pension Funds with integrated PEPP Prudential reporting using the XBRL taxonomy with the first hotfix.
